Cannot hide Arts.

HEire of thy Fathers goods, and his good parts,
Which both preſerveſt, & augment'ſt his ſtore,
Tracing th' ingenuous ſteps he trod before:
Proceed as thou begin'ſt, and win thoſe hearts,
With gentle curt'ſie, which admir'd his Arts.
Whilſt thou conceal'ſt thine own, & do'ſt deplore
Thy want, compar'd with his, thou ſhew'ſt them more.
Modeſty clouds not worth; but hate diverts,
And ſhames baſe envy, ARTS he CANNOT HIDE
That has them. Light through every chink is ſpy'd.

Nugas has ego, peſſimus Poëta,

To the Ingenious

READER.

FOr ſome *reaſons* I apprehend my ſelf engaged to give an *account* of *two* things, that refer to the enſuing *piece*: The one, for not *publiſhing* this *Catalogue* untill now: The other, of the *mode* & *manner* thereof, being partly *Latine*, and partly *Engliſh*.

About three yeares agoe,

goe, (by the perſwaſion of ſome *friends*) I was reſolved to take a *Catalogue* of thoſe *Rarities* and *Curioſities* which my *Father* had ſcedulouſly *collected*, and my *ſelfe* with continued diligence have *augmented*, & hitherto *preſerved* together: They then preſſed me with that Argument, *That the enumeration of theſe Rarities, (being more for variety than any one place known in* Europe *could afford) would be*

an

an honour to our Nation, and a benefit to ſuch ingenious perſons as would become further enquïrers into the various modes of Natures admirable workes, and the curious Imitators thereof: I readily yeilded to the *thing* ſo urged, and with the aſſiſtance of two worthy *friends* (well acquainted with my deſign,) we then began it, and many *examinations* of the *materialls* themſelves, & their *agreements* with ſeverall Au-

a thors

thors *compared*, a *Draught* was made, which they gave into my hands to examine over. Presently thereupon my *onely Sonne dyed*, one of *my Friends* fell very *sick* for about *a yeare*, and my *other Friend* by unhappy *Law-suits* much disturbed. Upon these accidents that *first Draught* lay neglected in *my hands* another year. Afterwards my said Friends call again upon me, and the designe of *Printing*, a-new *contri-*

ved,

ved, onely the prefixed *Pictures* were not ready, and I found my kinde friend Mr *Hollar* then engaged for about tenne Moneths, for whoſe hand to finiſh the *Plates*, I was neceſſarily conſtrained to ſtay untill this time.

Now for the *materialls* themſelves I reduce them unto two ſorts; one *Naturall*, of which ſome are more familiarly known & named amongſt us, as divers ſorts of Birds, foure-

footed Beaſts and Fiſhes, to whom I have given uſual *Engliſh* names. Others are leſſe familiar, and as yet unfitted with apt *Engliſh* termes, as the ſhell-Creatures, Inſects, Mineralls, Outlandiſh-Fruits, and the like, which are part of the *Materia Medica*; (Encroachers upon that faculty, may try how they can crack ſuch ſhels.) The other ſort is *Artificialls*; as Vtenſills, Houſeholdſtuffe, Habits, Inſtruments

ments of VVarre uſed by ſeverall Nations, rare curioſities of Art,&c. Theſe are alſo expreſſed in *Engliſh*, (ſaving the Coynes, which would vary but little if Tranſlated) for the ready ſatisfying whomſoever may deſire a view thereof. The *Catalogue* of my *Garden* I have alſo added in the Concluſion (and given the names of the *Plants* both in *Latine* and *Engliſh*) that nothing may be wanting which at

ſent comes within view, and might bee expected from

Your ready friend
